POTENTIAL HEALTH EFFECTS

Target Organs:

Overexposure may cause nervous system damage. Overexposure may cause lung damage. Overexposure may cause kidney damage.

Eye:

Liquid, aerosols and vapor of this product are irritating and can cause pain, tearing, reddening and swelling accompanied by a stinging sensation

and/or a feeling like that of fine dust in the eyes.

Skin:

Prolonged or repeated contact can result in defatting and drying of the skin which may result in skin irritation and dermatitis (rash).

Ingestion:

This material may be harmful or fatal if swallowed. Corrosive and may cause severe and permanent damage to mouth, throat and stomach.

Inhalation:

Headaches, dizziness, nausea, decreased blood pressure, changes in heart rate and cyanosis may result from over-exposure to vapor or skin exposure. Prolonged inhalation may be harmful.

Miscellaneous:

EMERGENCY: Vapors irritating to eyes and respiratory tract. Vapors may cause flash fire or explosion.

-----SECTION 4 - FIRST AID MEASURES -----

Eye:

Immediately flush eyes with plenty of water. Get medical attention, if irritation persists.

Skin:

Immediately flush skin with plenty of water. Remove clothing. Get medical

attention immediately. Wash clothing separately before reuse.

Ingestion:

Get medical attention immediately. If swallowed, do NOT induce vomiting. Give victim a glass of water or milk. Call a physician or poison control center immediately. Never give anything by mouth to an unconscious person.

Inhalation:

Remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get immediate medical attention.

Notes to Physician:

-----SECTION 5 - FIRE FIGHTING MEASURES -----

Unusual Fire and Explosion Hazards:

Vapors can travel to a source of ignition and flash back. "Empty" containers retain product residue (liquid and/or vapor) and can be dangerous. DO NOT PRESSURIZE, CUT, WELD, BRAZE, SOLDER, DRILL, GRIND, OR EXPOSE SUCH CONTAINERS TO HEAT, FLAME, SPARKS, STATIC ELECTRICITY, OR OTHER SOURCES OF IGNITION; THEY MAY EXPLODE AND CAUSE INJURY OR DEATH. Empty drums should be completely drained, properly bunged and promptly returned to a drum reconditioner, or properly disposed of.

Special Fire Fighting Procedures:

Containers can build up pressure if exposed to heat (fire). As in any fire, wear self-contained breathing apparatus pressure-demand (MSHA/NIOSH

approved or equivalent) and full protective gear.

General Information:**-----SECTION 6 - ACCIDENTAL RELEASE MEASURES -----****Disposal:**

DISPOSE IN ACCORDANCE WITH ALL FEDERAL, STATE, AND LOCAL REGULATIONS.

Spills/Leaks:**-----SECTION 7 - HANDLING and STORAGE -----****Handling:**

Wash thoroughly after handling.

Storage:

Keep away from heat, sparks and flame. Keep from freezing.

-----SECTION 8 - EXPOSURE CONTROLS, PERSONAL PROTECTION -----**Engineering Controls:**

Local exhaust ventilation may be necessary to control any air contaminants

to within their TLVs during the use of this product.

Eyes:

Wear safety glasses with side shields (or goggles) and a face shield.

Skin:

Where contact is likely, wear chemical resistant gloves, a chemical suit,

rubber boots, and chemical safety goggles plus a face shield.

Clothing:

STANDARD INDUSTRIAL CLOTHING STANDARDS SHOULD BE FOLLOWED.

Respirators:

A NIOSH/MSHA approved air purifying respirator with an organic vapor cartridge or canister may be permissible under certain circumstances where airborne concentrations are expected to exceed exposure limits. Protection provided by air purifying respirators is limited. Use a positive pressure air supplied respirator if there is any potential for an uncontrolled release, exposure levels are not known, or any other circumstances where air purifying respirators may not provide adequate protection.
