# SAFETY DATA SHEET

Calsol 810

#### Section Identification

GHS product identifier Calsol 810

**Product code** 300750100000

Chemical name Distillates (petroleum), hydrotreated heavy naphthenic

identification

Other means of Baseoil - unspecified; Distillates, petroleum, hydrotreated heavy naphthenic;

petroleum distillates, hydrotreated heavy naphthenic; Mineral oil, petroleum distillates, Hydrotreated heavy naphthenic distillate, solvent extract, petroleum; Mineral oil, hydrotreated (severe) heavy naphthenic; Distillates (petroleum), hydro-treated heavy

naphthenic; Hydrotreated heavy naphthenic distillate solvent extract (petroleum); OILS, MINERAL, HEAVY NAPHTHENIC, HYDROTREATED; OILS, NAPHTHENIC, HYDROGENATED; SEVERELY SOLVENT REFINED HEAVY PARAFFINIC

DISTILLATES; HYDROTREATED LIGHT PETROLEUM DISTILLATE

Product type

Liquid.

# Relevant identified uses of the substance or mixture and uses advised against

Identified uses

Petrochemical industry: Petroleum refining. Naphthenic Lubricant.

None known Uses advised against Reason

Supplier's details

Calumet Refining, LLC

2780 Waterfront Pkwy E. Drive Suite 200

Indianapolis, IN 46214

Technical Services: 317-328-5660

24 hr. CHEMTREC 1-800-424-9300 / International 1-703-527-3887

1-800-424-9300 / 24hr. CHEMTREC

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

concentrations applicable, are classified as hazardous to health or the environment and hence require reporting There are no additional ingredients present which, within the current knowledge of the supplier and in the in this section.

Occupational exposure limits, if available, are listed in Section 8.

# Section 4. First aid measures

Description of necessary first aid measures

eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 Immediately flush eyes with plenty of water, occasionally lifting the upper and lower Eye contact

minutes. Get medical attention.

Inhalation

respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention if adverse health effects persist or are severe. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial Remove victim to fresh air and keep at rest in a position comfortable for breathing.

Wash skin thoroughly with soap and water or use recognized skin cleanser. Remove contaminated clothing and shoes. Get medical attention if symptoms occur. Clean shoes thoroughly before reuse. clothing before reuse.

tie, belt or waistband

Skin contact

Ingestion

Get medical attention immediately. Call a poison center or physician. Wash out mouth person is conscious, give small quantities of water to drink. Stop if the exposed person be kept low so that vomit does not enter the lungs. Never give anything by mouth to an lungs and cause damage. Do not induce vomiting. If vomiting occurs, the head should attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed feels sick as vomiting may be dangerous. Aspiration hazard if swallowed. Can enter unconscious person. If unconscious, place in recovery position and get medical tie, belt or waistband

#### Section 4. First aid measures

Eye contact No known significant effects or critical hazards

Inhalation No known significant effects or critical hazards.

Skin contact Defatting to the skin. May cause skin dryness and irritation.

Ingestion May be fatal if swallowed and enters airways

## Over-exposure signs/symptoms

Eye contact No specific data

Inhalation No specific data.

Skin contact Adverse symptoms may include the following:

irritation

cracking dryness

Ingestion Adverse symptoms may include the following:

nausea or vomiting

# Indication of immediate medical attention and special treatment needed, if necessary

Notes to physician Treat symptomatically. Contact poison treatment specialist immediately if large

quantities have been ingested or inhaled.

Specific treatments No specific treatment.

Protection of first-aiders No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

See toxicological information (Section 11)

#### Section Ç Fire-fighting measures

#### Extinguishing media

Suitable extinguishing Use an extinguishing agent suitable for the surrounding fire

Unsuitable extinguishing Do not use water jet.

Specific hazards arising • • In a fire or if heated, a pressure increase will occur and the container may burst.

from the chemical

Hazardous thermal Decomposition products may include the following materials:

decomposition products carbon monoxide carbon dioxide

for fire-fighters Special protective actions

٠. Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable

equipment for fire-fighters Special protective

Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

#### Section <u>က</u> Accidental release measures

# Personal precautions, protective equipment and emergency procedures

For non-emergency ٠.

No action shall be taken involving any personal risk or without suitable training inadequate. Provide adequate ventilation. Wear appropriate respirator when ventilation is Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Avoid breathing vapor or Put on appropriate personal protective equipment.

For emergency responders

emergency personnel" Section 8 on suitable and unsuitable materials. See also the information in "For non-If specialized clothing is required to deal with the spillage, take note of any information in

# Section 6. Accidental release measures

: Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental **Environmental precautions** 

pollution (sewers, waterways, soil or air).

# Methods and materials for containment and cleaning up

Small spill

Large spill

Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

Wash Contaminated diatomaceous earth and place in container for disposal according to local regulations upwind. Prevent entry into sewers, water courses, basements or confined areas. V spillages into an effluent treatment plant or proceed as follows. Contain and collect Move containers from spill area. Approach release from spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or Note: see Section 1 for emergency contact information and Section 13 for waste disposal. (see Section 13). Dispose of via a licensed waste disposal contractor. absorbent material may pose the same hazard as the spilled product. Stop leak if without risk.

#### storage and Section 7. Handling

### Precautions for safe handling

Avoid contact with eyes, skin and clothing. Avoid breathing vapor or mist. Keep in the original container or an approved alternative made from a compatible material, kept Put on appropriate personal protective equipment (see Section 8). Do not swallow. tightly closed when not in use. Empty containers retain product residue and can be Protective measures

hazardous. Do not reuse container.

Advice on general

Remove contaminated clothing and protective equipment before handled, stored and processed. Workers should wash hands and face before eating, Eating, drinking and smoking should be prohibited in areas where this material is See also Section 8 for additional information on hygiene drinking and smoking. entering eating areas. measures, occupational hygiene

Conditions for safe storage, including any

incompatibilities

. .

Use appropriate containment to avoid environmental contamination. See Section 10 for direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials Store in original container protected from (see Section 10) and food and drink. Store locked up. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers incompatible materials before handling or use. Store in accordance with local regulations.

## controls/personal protection Section 8. Exposure

#### Control parameters

### Occupational exposure limits

Ingredient name	Exposure limits
Distillates (petroleum), hydrotreated heavy naphthenic	ACGIH TLV (United States, 3/2018).
	TWA: 5 mg/m³ 8 hours. Form: Inhalable
	fraction
	OSHA PEL (United States, 5/2018).
	TWA: 5 mg/m³ 8 hours.
	NIOSH REL (United States, 10/2016).
	TWA: 5 mg/m3 10 hours. Form: Mist
	STEL: 10 mg/m³ 15 minutes. Form: Mist

Appropriate engineering

Good general ventilation should be sufficient to control worker exposure to airborne contaminants.

#### Section <u></u> **Exposure** controls/personal protection

controls Environmental exposure

will be necessary to reduce emissions to acceptable levels. they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment Emissions from ventilation or work process equipment should be checked to ensure

## Individual protection measures

Hygiene measures

Wash hands, forearms and face thoroughly after handling chemical products, before showers are close to the workstation location. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety Appropriate techniques should be used to remove potentially contaminated clothing. eating, smoking and using the lavatory and at the end of the working period

Eye/face protection

Safety eyewear complying with an approved standard should be used when a risk the assessment indicates a higher degree of protection: safety glasses with sidegases or dusts. If contact is possible, the following protection should be worn, unless assessment indicates this is necessary to avoid exposure to liquid splashes, mists,

Skin protection

**Hand protection** 

Chemical-resistant, impervious gloves complying with an approved standard should be noted that the time to breakthrough for any glove material may be different for different during use that the gloves are still retaining their protective properties. It should be protection time of the gloves cannot be accurately estimated. glove manufacturers. necessary. Considering the parameters specified by the glove manufacturer, check worn at all times when handling chemical products if a risk assessment indicates this is In the case of mixtures, consisting of several substances, the

Body protection

Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Other skin protection

specialist before handling this product. Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a

Respiratory protection

Based on the hazard and potential for exposure, select a respirator that meets the respiratory protection program to ensure proper fitting, training, and other important appropriate standard or certification. Respirators must be used according to a

# Section 11. Toxicological information

## Information on toxicological effects

#### Acute toxicity

Product/ingredient name	Result	Species	Dose	Exposure	
Distillates (petroleum), hydrotreated heavy	LC50 Inhalation Dusts and mists Rat	Rat	5.7 mg/l	4 hours	
	LD50 Dermal	Rabbit	>2000 mg/kg	•	
	LD50 Oral	Rat	>5000 mg/kg	3	

#### Irritation/Corrosion

Not available.

#### Sensitization

Not available.

#### Mutagenicity

Not available,

#### Carcinogenicity

Not available,

The classification as a carcinogen need not apply as it can be shown that the substance contains less than 3 % DMSO extract as measured by IP 346. .. Conclusion/Summary

#### Reproductive toxicity

Not available.

#### **Teratogenicity**

Not available.

Specific target organ toxicity (single exposure)

# Section 11. Toxicological information

# Specific target organ toxicity (repeated exposure)

Not available.

#### Aspiration hazard

Distillates (petroleum), hydrotreated heavy naphthenic  ASPIRATION HAZARD - Category 1

routes of exposure Information on the likely Routes of entry anticipated: Oral, Dermal, Inhalation.

### Potential acute health effects

Eye contact No known significant effects or critical hazards.

Inhalation No known significant effects or critical hazards

Skin contact Defatting to the skin. May cause skin dryness and irritation.

Ingestion May be fatal if swallowed and enters airways.

# Symptoms related to the physical, chemical and toxicological characteristics

Eye contact : No specific data.

Inhalation : No specific data.

Skin contact Adverse symptoms may include the following:

irritation

dryness cracking

Ingestion Adverse symptoms may include the following:

nausea or vomiting

# Delayed and immediate effects and also chronic effects from short and long term exposure

#### Short term exposure

Potential immediate : Not available.

effects

Potential delayed effects : Not available.

Long term exposure

Potential immediate : Not available.

effects

Potential delayed effects : Not available.

### Potential chronic health effects

Not available.

General Prolonged or repeated contact can defat the skin and lead to irritation, cracking and/or dermatitis.

Carcinogenicity No known significant effects or critical hazards.

Mutagenicity No known significant effects or critical hazards.

Teratogenicity No known significant effects or critical hazards.

Fertility effects **Developmental effects** No known significant effects or critical hazards. No known significant effects or critical hazards

## Numerical measures of toxicity

#### Acute toxicity estimates

Not available

#### **Ecological information** 12. Section

#### **Toxicity**

Product/ingredient name	Result	Species	Exposure
Distillates (petroleum),	Acute EC50 >100 mg/l	Algae	72 hours
hydrotreated heavy			••
naphthenic			
	Acute EC50 >100 mg/l	Crustaceans	48 hours
	Acute LC50 >100 mg/l	Fish	96 hours

### Persistence and degradability

Product/ingredient name Aqua	Aquatic half-life	Photolysis	Biodegradability
Distillates (petroleum), - hydrotreated heavy naphthenic			Inherent

### Bioaccumulative potential

Not available

#### **Mobility in soil**

Not available. Soil/water partition coefficient (Koc)

Other adverse effects

No known significant effects or critical hazards.

### Disposal considerations Section 13.

Disposal methods

via a licensed waste disposal contractor. Waste should not be disposed of untreated to Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a the sewer unless fully compliant with the requirements of all authorities with jurisdiction. safe way. Care should be taken when handling emptied containers that have not been requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products The generation of waste should be avoided or minimized wherever possible. Disposal cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains of this product, solutions and any by-products should at all times comply with the and sewers.

### Transport information Section 14.

	DOT Classification	TDG Classification	IMDG	IATA
UN number	Not regulated.	Not regulated.	Not regulated.	Not regulated.

Transport within user's premises: always transport in closed containers that are ٠. Special precautions for user

upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

: Not available Transport in bulk according to Annex II of MARPOL and

the IBC Code
