LELAND

Safety Data Sheet

Leland Limited Inc. Product: Argon Revised on:May 29,2018

1. Identification

Product Identifiner

: Argon

Other means of

: Argon, Argon gas, Ar, UN 1006

identification

: Synthetic, Analytical chemistry

Product use Supplier

Leland Limited, Inc.

2614 South Clinton Ave. South Plainfield, NJ 07080 1-908-668-1008 (9-5 EST)

Emergency calls

Hazmat Service Inc.

1-800-373-7542 (Domestic)

Contract #1264

1-484-951-2432 (International)

2. Hazards Identification

OSHA/HCS status

This material is considered hazardous by the OSHA Hazard

Communication Standard (29 CFR 1910. 1200).

Classification of the substance or mixture GHS label elements Hazard pictograms

Gases under pressure – Compressed gas

Signal word

Warning

Hazards statements

Contains gas under pressure; may explode if heated May displace oxygen and cause rapid suffocation

May increase respiration and heart rate

Precautionary statements

General

Read and follow all Safety Data Sheets (SDS'S) before use. Read label before use. Keep out of reach of children. If medical advice is needed, have product container or label at hand. Close valve after each use and when empty. Use equipment rated for cylinder pressure. Do not open valve until connected to equipment prepared for use. Use a back flow preventative device in the piping. Use only equipment of compatible materials of construction. Always keep container in upright position.

Prevention

Use and store outdoors or in a well ventilated place.

Response

IF INHALED: Remove person to fresh air and keep comfortable for

breathing. Call a POISON CENTER or doctor/physician if you feel unwell.

Storage

Protect from sunlight. Protect from sunlight when ambient temperature

exceeds 40C/104F. Store in a well-ventilated place.

Disposal

Dispose in accordance with all applicable regulations.

Hazards not otherwise

In addition to any other important health or physical hazards, this product

classified

may displace oxygen and cause rapid suffocation.

Leland Limited İnc. Product: Argon Revised on:May 29,2018

3. Composition, Information on Ingredients

Substance/Mixture

Substance

Chemical Name

Argon

Synonyms

Argon, Argon gas, Ar, UN 1006

CAS Number

7440-37-1

Content (vo%)

99.5 % or more

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

4. First Aid Measures

Description of necessary first aid measures

Inhalation

: Remove exposed person to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular, or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention if adverse health effects persist or are severe. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

Skin Contact

Argon is harmless at atmospheric pressure.

Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur. Wash

clothing before reuse. Clean shoes thoroughly before reuse.

Eye Contact

: Argon is harmless at atmospheric pressure.

Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention if irritation occurs.

Ingestion

Since this product is a gas, refer to the inhalation section.

Most important symptoms/effects, acute and delayed

Potential acute health effects

Inhalation

: Exposure to decomposition products may cause a health hazard. Serious

effects may be delayed following exposure.

Skin Contact

Contact with rapidly expanding gas may cause burns or frostbite.

Eve Contact

Contact with rapidly expanding gas may cause burns or frostbite.

Frostbite

Try to warm up the frozen tissues and seek medical attention.

Ingestion : Since this product is a gas, refer to the inhalation section.

Over-exposure signs/symptoms

Inhalation

No specific data.

Skin Contact

No specific data.

Eye Contact

No specific data.

Ingestion

No specific data.

Leland Limited Inc. Product: Argon Revised on:May 29,2018

Indication of immediate medical attention and special treatment needed, if necessary

Notes to physician

: Treat symptomatically. Contact poison treatment specialist immediately if

large quantities have been ingested or inhaled.

Specific treatments

No specific treatment.

Protection of first-aiders

No action shall be taken involving any personal risk or without suitable

training. It may be dangerous to the person providing aid to give

mouth-to-mouth resuscitation.

5. Fire Fighting Measures

Extinguishing media

Suitable extinguishing

media

: Use an extinguishing agent suitable for the surrounding fire.

Unsuitable extinguishing

media

None known.

Specific hazards arising

from the chemical

: Contains gas under pressure. In a fire or if heated, a pressure increase

will occur and the container may burst or explode.

Hazardous thermal

decomposition products Special protective actions

for fire-fighters

No specific data.

: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Contact supplier immediately for specialist

advice. Move containers from fire area if this can be done without risk.

Use water spray to keep fire-exposed containers cool.

Special protective

equipment for fire-fighters

Fire-fighters should wear appropriate equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive

pressure mode.

6. Accidental Release Measures

Personal precautions, protective equipment and emergency procedures

For non-emergency

personnel

No action shall be taken involving any personal risk or without suitable

training. Evacuate surrounding areas. Keep unnecessary and

unprotected personnel from entering. Avoid breathing gas. Provide adequate ventilation. Wear appropriate respirator when ventilation is

inadequate. Put on appropriate personal protective equipment.

For emergency responders

If specialized clothing is required to deal with the spillage, take note of any

information in Section 8 on suitable and unsuitable materials. See also

the information in "For non-emergency personnel".

Environmental precautions

Ensure emergency procedures to deal with accidental gas releases are in place to avoid contamination of the environment. Inform the relevant

authorities if the product has caused environmental pollution (sewers,

waterways, soil or air).

Methods and materials for containment and cleaning up

Small spill

Immediately contact emergency personnel. Stop leak if without risk.

Large spill

Immediately contact emergency personnel. Stop leak if without risk. Note:

see Section 1 for emergency contact information and Section 13 for

waste disposal.

Leland Limited Inc. Product: Argon Revised on:May 29,2018

7. Handling and Storage

Precautions for safe handling Protective measures

Put on appropriate personal protective equipment (see Section 8). Contains gas under pressure. Avoid contact with eyes, skin and clothing. Avoid breathing gas. Empty containers retain product residue and can be hazardous. Do not puncture or incinerate container. Use equipment rated for cylinder pressure. Close valve after each use and when empty. Protect cylinders from physical damage; do not drag, roll, slide, or drop. Use a suitable hand truck for cylinder movement.

Advice on general occupational hygiene

Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

Conditions for safe storage, including any incompatibilities

Store in accordance with local regulations. Store in a segregated and approved area. Store away from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10). Keep container tightly closed and sealed until ready for use. Cylinders should be stored upright, with valve protection cap in place, and firmly secured to prevent falling or being knocked over. Cylinder temperatures should not exceed 40C (104F).

8. Exposure Controls and Personal Protection

Control parameters

Occupational exposure limits

| Ingredient name | Exposure limits | |
|-----------------|-------------------------------|--|
| Argon | Oxygen Depletion [Asphyxiant] | |

Appropriate engineering controls

: Good general ventilation should be sufficient to control worker exposure to airborne contaminants.

Environmental exposure control

Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

Individual protection measures

Hygiene measures

Wash hands, forearms and face thoroughly after handling chemical

products, before eating, smoking, using the lavatory and at the end of your

shift.

Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the

workstation location.

Eye/Face protection

: Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following

LELAND

Safety Data Sheet

Leland Limited Inc. Product: Argon Revised on:May 29,2018

protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.

Skin protection

Hand protection : Chemical-resistant, impervious gloves complying with an approved

standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances,

the protection time of the gloves cannot be accurately estimated.

Body protection : Personal protective equipment for the body should be selected based on

the task being performed and the risks involved and should be approved

by a specialist before handling this product.

Other skin protection : Appropriate footwear and any additional skin protection measures should

be selected based on the task being performed and the risks involved and

should be approved by a specialist before handling this product.

Respiratory protection : Use a properly fitted, air-purifying or air-fed respirator complying with an

approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the

selected respirator.

9. Physical and Chemical Properties

Appearance

Physical state : Gas [Compressed gas]

Color : Colorless
Molecular weight : 39.95 g/mol

Molecular formula : Ar

Boiling/condensation point : -185.9C (-302.6F)

Melting/freezing point : -189.2C (-308.6F)

Critical temperature : -122.4C (-188.3F)

Odor : Odorless

Odor threshold : Not available.
pH : Not available.

Flash point : [Product does not sustain combustion.]

Burning time : Not applicable.

Burning rate : Not applicable.

Evaporation rate : Not available.

Flammability (solid, gas) : Not available.

Lower and upper explosive : Not available.

10. Stability and Reactivity

Reactivity

No specific test data related to reactivity is available for this product or its

ingredients.

Chemical stability

The product is stable.

Possibility of hazardous

reactions

Under normal conditions of storage and use, hazardous reactions will not

occur.

Conditions to avoid

No specific data.

Hazardous decomposition products

Under normal conditions of storage and use, hazardous decomposition

products should not be produced.

Hazardous polymerization

: Under normal conditions of storage and use, hazardous polymerization

will not occur.

11. Toxicological Information

Leland Limited Inc. Product: Argon Revised on:May 29,2018

13. Disposal Considerations

Discharge of Argon

Gradually release in open air.

Disposal of Cylinders

If gas remains in cylinders, release gas with proper equipment and

dispose of cylinders as incombustible waste.

For empty cylinders, check for a puncture hole and dispose of as

incombustible waste.

Do not dispose of cylinders without first checking that all gas has been

released.
