# Material Safety Data Sheet

Prepared according to US OSHA, CMA, ANSI and Canadian WHMIS Standards.

### Section 1. Chemical product and company identification

Commercial name(s).

: Oxygen/ALIGAL TM 3/LASAL TM 2003.

MSDS no.

10074

**Product use** 

Medical, welding and general analytical or synthetic chemical uses.

Manufactured/supplied

2700 Post Oak Drive

Houston, TX 77056-8229

**Emergency telephone** 

number

**Address** 

CHEMTREC: 1-800-424-9300

Telephone no.

**GENERAL MSDS** 

1-(713)-896-2896

INFORMATION Fax on Demand

1-(800)-231-1366

### Section 2. Hazards identification

**Physical state** 

: Gas.

**OSHA/HCS** status

: This material is classified hazardous under OSHA regulations in the United States and

the WHMIS Controlled Product Regulation in Canada.

: WARNING **Emergency overview** 

STRONG OXIDIZER. CONTACT WITH OTHER MATERIAL MAY CAUSE FIRE. HIGH

PRESSURE GAS.

Keep away from heat (<52°C/125°F). Use only with adequate ventilation. Extremely hazardous gas under pressure. Keep cylinder valve closed when the product is not used.

Gas may accumulate in confined areas.

**Routes of entry** 

Potential acute health effects

: Inhalation. Dermal contact. Eye contact.

Inhalation

: Inhlation of this product may cause hyperoxia.

Skin : No known significant effects or critical hazards. **Eyes** : No known significant effects or critical hazards.

Since the product is a gas, it will probably be inhaled rather than ingested. See above. Ingestion

Potential chronic health

effects

: Carcinogenic effects: Not classified or listed by IARC, NTP, OSHA, EU and ACGIH.

Mutagenic effects: Not available. Teratogenic effects: Not available.

Over-exposure signs/symptoms

Inhalation : No specific data. Ingestion : No specific data. Skin No specific data. No specific data. **Eyes** : None known. **Medical conditions** 

aggravated by over-

exposure

See toxicological information (section 11)

# Section 3. Composition, Information on Ingredients

CAS number mole %

Canada

Oxygen 7782-44-7 99.5

#### **United States**

Chemical name	CAS#	mole %	Occupational exposure limits	IDLH
Oxygen	7782-44-7	99.5	Not applicable	NE

NE: Not Established C: Ceiling Limit See Section 16 for possible acronym definitions

See Sections 8, 11, 14 and 15 for details.

#### Section 4. First aid measures

Prompt medical attention is mandatory in all cases of overexposure to this gas. Rescue personnel should wear a self-contained breathing apparatus and be awared of the extremely high risk of fire, caused by overoxygenated atmospheres.

**Inhalation** : If inhaled, remove to fresh air. If not breathing, give artificial respiration. Get medical

attention if symptoms appear.

Skin contact: Not applicable.Eye contact: Not applicable.

**Ingestion**: Since the product is a gas, it will probably be inhaled rather than ingested. See above.

**Notes to physician** : The medical doctor must be warned that the person may suffer from hyperoxia.

### Section 5. Fire fighting measures

Flammability of the product : Non-flammable.

This gas vigorously accelerate combustion. Avoid all contact with combustible materials. Some non-flamamble materials in air will burn under an overoxygenated atmosphere.

Products of combustion

Explosion hazards in the presence of various substances

: No specific data.

: Container explosion may occur under fire conditions or when heated.

Fire-fighting media and instructions

: Use an extinguishing agent suitable for the surrounding fire.

Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Contact supplier immediately for specialist advice. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.

Contains gas under pressure. Contact with combustible material may cause fire. This material increases the risk of fire and may aid combustion. In a fire or if heated, a pressure increase will occur and the container may burst or explode.

Special protective equipment for fire-fighters

Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

### Section 6. Accidental release measures

#### **Personal precautions**

: EVACUATE ALL PERSONNEL FROM AFFECTED AREA. Use appropriate protective equipment. If leak is in user's equipment, be certain to purge piping with an inert gas prior to attempting repairs. If leak is on cylinder or cylinder valve, contact the closest Air Liquide location.

#### **Environmental precautions**

: In case of a leak, clear the affected area, protect people, eliminate sources of ignition and respond with trained personnel.

If leaking incidentally from the cylinder or its valve, contact your supplier. Use nonsparking tools and equipment during the response.

#### Methods for cleaning up

Contact your local Air Liquide Gas supplier for details.

## Section 7. Handling and storage

#### **Handling**

: Valve protection caps must remain in place unless cylinder is secured with valve outlet piped to usage point. Do not drag, slide or roll cylinders. Use a suitable hand truck for cylinder movement. Use a pressure regulator when connecting cylinder to lower pressure piping or systems. Do not heat cylinder by any means to increase the discharge rate of product from the cylinder. Use a check valve or trap in the discharge line to prevent hazardous back flow to the cylinder. Do not tamper with (valve) safety device. Close valve after each use and when empty.

#### **Storage**

Protect cylinders from physical damage. Store in cool, dry, well-ventilated area of non combustible construction away from heavy traffic areas and emergency exits. Do not allow the temperature where cylinders are stored to exceed 52°C/125°F. Cylinders must be stored upright and firmly secured to prevent falling or being knocked over. Full and empty cylinders should be segregated. Prevent full cylinders being stored for excessive periods of time. Post "No Smoking or Open Flames" signs in the storage or use area. There should be no source of ignition in the storage or use area.

## Section 8. Exposure controls/personal protection

**Engineering controls** 

**Personal protection** 

Respiratory **Hands** 

**Eyes** 

Skin/Body

- : Use only in well-ventilated areas.
- : Not required under normal conditions of use.
- : Wear leather gloves when handling cylinders of this gas. Otherwise, wear glove protection appropriate to the specific operation for which this gas is used.
- : Safety glasses with side shields.
- : Use body protection appropriate for task. Cotton clothing is recommended for use to prevent static electric build-up. Pressurized product may require use of fire retardant

Metal cap, safety shoes are recommended when handling cylinders.

Some applications of this product may require additionnal or other specific protective clothings. Please consult your supervisor.

of a major leak

Personal protection in case : Safety glasses with side shields, goggles or face shield. Impervious gloves. Protective clothing. Metal cap, safety shoes. Wear MSHA/NIOSH-approved self-contained breathing apparatus or equivalent and full protective gear.

## Section 9. Physical and chemical properties

**Physical state** : Gas. Color : Colorless. Odor : Odorless. Molecular weight : 32 g/mole

Molecular formula

**Boiling/condensation point** : -183.11°C (-297.6°F) **Melting/freezing point** : -218.55°C (-361.4°F)

### Section 10. Stability and reactivity

Stability and reactivity

: The product is stable.

**Incompatibility with various** 

: Reactive or incompatible with the following materials: organic materials.

substances

**Hazardous decomposition** 

Under normal conditions of storage and use, hazardous decomposition products should

products

not be produced.

**Hazardous polymerization** 

: Under normal conditions of storage and use, hazardous polymerization will not occur.

## Section 11. Toxicological information

**Acute Effects** 

: Inhlation of this product may cause hyperoxia. Inhalation Skin : No known significant effects or critical hazards. : No known significant effects or critical hazards. **Eyes** 

Ingestion

Since the product is a gas, it will probably be inhaled rather than ingested. See above.

Potential chronic health effects

Carcinogenic effects: Not classified or listed by IARC, NTP, OSHA, EU and ACGIH.

Mutagenic effects: Not available. Teratogenic effects: Not available.

### Section 12. Ecological information

**Products of degradation** : This gas is released as is in the atmosphere.

### Section 13. Disposal considerations

**Disposal** 

: Residual materials contained in customer-owned cylinders should be disposed of in accordance with Federal, State and Local regulations on waste management. For residual materials contained in cylinders owned by Air Liquide, contact Sales or Customer Service to determine appropriate disposal. Do not return cylinders without authorization from Air Liquide.
